SUMMARY

I am an innovative full stack developer with a passion for problem solving and learning. Bringing varied experiences from customer service, business development, and IT-recruitment, I've honed my skill sets in adaptability and critical thinking. Moving forward, I am committed to further enhancing the quality of code and design to generate success where I go.

TECHNICAL SKILLS

HTML | JavaScript | CSS | SQL | Git | Github | nextjs | Python | Node | Express.js | django | react | mongoDB | Auth0

RELEVANT EXPERIENCE

MEMORY GAME | individual project created using javaScript, HTML and CSS

Developer | 1 week | Live | Github

- *Created a memory matching card game using javascript in which the cards display various image on the face and the user has a limited number of guesses to match all cards*
- Added flip animation, shuffle animation and created the option for users to pick a theme of the cards

SEI PETS ALIVE | Team Database Project created using MongoDb, javaScript, HTML, CSS, Express, and Node, heroku, google 0auth

Developer | 1 week | Live | Github

- *A simple dog adoption application*
- *User is able to view all the dogs available for adoption, view their details and create an application to adopt*
- *The user has full CRUD functionality for their applications, they can also see if other users have applied to adopt*
- *The admin user has the ability to CRUD all dogs for adoption and edit/delete applications from users*
- *This was a group project I was backend focused–setting up 0 auth, connecting the db, creating models and routes*

FESTIVAL ACE | Solo Database project created using Python, django, bootstrap, js, heroku, postgresql

Developer | 1.5 weeks | Live | Github

- *A festival planning application*
- *Used django to allow users to login and logout, users could view all festivals and their details they can select/ favorite the festivals they plan to go to*
- *When a user is on their festivals page which are the festivals tied to their id in the db they are able to add tasks related to planning their trip and add items to their packing list. Full CRUD on both features*
- *Only Admin users are able to CRUD festival details, Festivals db is seeded*

REACT DEV BLOG| Solo Database MERN stack project created using MongoDB, Express.js, React, Node.js, tailwindCSS, Auth0, Postman, Heroku, and Netlify

Developer | 1.5 weeks | Live | Github

- *A blog application where users can log in and create blogs, they can leave comments on other blog posts and CRUD their own posts*
- *Used MERN Stack to create Blog posts, and comments. Used Auth 0 to implement authorization on the front end. Connected the Application to MongoDB fetched/ posted data to the database*
- *When creating this Application I originally wrote the whole app using React, graphql and graphCMS, ultimately I re-made it in MERN to get more experience creating a MERN app*
